CAREER OBJECTIVE

Aspiring Information science and Engineering Undergraduate with hands-on knowledge of Python, Machine Learning, Natural Language Processing (NLP), Generative AI, Django, Django REST Framework, PostgreSQL, SQL, and web development. Experienced in data analysis and AI-oriented projects, with hands-on experience in Docker containerization and modern development tools. Seeking to apply Python, AI/ML, data processing, and full-stack development skills to context-aware AI applications and impactful software products.

EDUCATION

Bachelor of Engineering (BE) –
Gopalan College of Engineering and Management | Affiliated to VTU | 2023–2027

Pre-University Course (PUC) –
Sri Saraswati Vidya Niketan Independent PU College 2022–2023

PROJECTS

YouTube Data Analysis

- Developed a Python-based data analysis project to process and analyze large datasets containing YouTube video statistics.
- Applied data structures and algorithmic concepts to organize and efficiently process data.
- Used Python and Microsoft Excel for data analysis and presentation of insights.

Technologies: Python, Data Structures & Algorithms, Microsoft Excel

Hakuna Matata – AI-Based Student Mental Health Analyzer

- Developed a web-based AI-oriented application to analyze and monitor student-related inputs through an interactive interface.
- Built an interactive front-end experience for user interaction and presentation of analysis results.

Technologies: HTML, CSS, JavaScript

Jeeva Raksha – AI-Based Multilingual Smart Health Assistant

- Developed an AI-based multilingual smart health assistant designed to analyze user symptoms and provide possible health-condition information.
- Implemented emergency alerts for critical conditions and designed an interactive web interface for users.

Technologies: HTML, CSS, JavaScript

TECHNICAL SKILLS

Programming: Python, Java, C
AI & Machine Learning: Machine Learning, Natural Language Processing (NLP), Generative AI Fundamentals
Backend & Web: Django, Django REST Framework, HTML, CSS, JavaScript
Database: PostgreSQL, SQL
Data & Analysis: Python-based Data Analysis, Data Processing, Microsoft Excel
Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook

CERTIFICATIONS

- IBM (Coursera) – Machine Learning with Python
- EduBridge – Learn Generative AI
- Infosys Springboard – Java Programming Fundamentals
- IBM – Introduction to HTML, CSS and JavaScript

ACHIEVEMENTS

- National Finalist (Top 150) – National Cloud Innovation Challenge by 3SVK, Team InnoSpark
- Participant | AVINYA 2.0 National Level Hackathon (2026) Developed Jeeva Raksha – AI Medical Assistant during a 24-hour hackathon.
- Certificate of Merit – National Cloud Innovation Challenge
- Certificate of Participation – Phase 2, National Cloud Innovation Challenge
- Certificate of Participation – TATA Crucible Campus Quiz 2025
